

Sajith (Saj) Nair
Partner

T: 416-815-5185
s.nair@pwc.com

Saj is a Partner with PwC Canada and leads their Canadian Cybersecurity & Privacy practice. He has international experience working with financial institutions in North America, Australia, Asia and Europe helping them from strategy through execution on their cybersecurity program and responding to breaches.

He has led numerous consulting engagements to define and execute on business aligned, risk intelligent and sustainable strategies for achieving cyber resilience. He enjoys teaming up and working collaboratively with his client's executive stakeholders and their team to transform their security, enterprise risk and technology functions to become more integrated and resilient in the digital age.

He is a frequent speaker at industry events and conferences, and is regularly sought after by clients for presenting complex cyber security concepts in 'plain language' to client executives, boards and audit committees.

His core area of specialization include:

- Executive awareness
- Cybersecurity strategy
- Threat modelling & intelligence
- Privacy & data protection
- Security architecture
- M&A security
- Identity & Access Management
- Security operations and analytics
- Cloud and outsourcing risk
- Cyber crisis management.

He holds a Bachelor of Engineering from University of Sydney, Australia and holds several cybersecurity related professional accreditations.
